-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 1, 2005 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vance ('524).

Vance discloses a method for analyzing a ground structure by positioning a plurality of microseismic oscillation wave sensors (T1-Tm) and measuring microseismic oscillations at the measurement points to obtain data generated by the microseismic oscillations. The oscillations includes at least one of horizontal and vertical data. The method includes analyzing the data by data analyzer (16). On col. 2, lines 39-40, Vance does suggest that the locations for microseismic data measurements are "moved

to new locations as excavation in the mine proceeds". Thus, Vance does suggest the moving of microseismic sensors for measuring microseismic events.

The difference between the method of claim 1 and the method disclosed by Vance is the instant claim specifies that the measurements are repeated after changing the locations of the measurement points and then the data is analyzed. It would be obvious to one of ordinary skill in the art that the system disclosed by Vance would repeat the measurements after changing the locations of the measurement points. Claim 1 is so rejected.

Dependent claims 2-8 are further provided by Vance.

4. The terminal disclaimer filed on June 2, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of April 16, 2011 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
